SUMMARY

WordPress developer with 2 years of production experience at Vocsy Infotech, Surat, promoted from intern to developer within 6 months. Delivered live e-commerce stores for clients, and used an AI-assisted workflow (Claude Code) to build and launch 50+ blogging websites. BCA graduate (VNSGU, 2026) with an 8.7 CGPA. Currently working with WordPress and Claude Code (AI agents and AI-assisted development), and preparing for a move into AI/ML engineering.

WORK EXPERIENCE

AI WordPress Developer · Vocsy Infotech, Surat — Mar 2026 – Present

- Design and run an AI-assisted build pipeline on Claude Code: 50+ blogging websites launched on a standardized base theme and plugin stack, every generated file reviewed, about a day per site.
- Build, customize, and maintain WordPress client websites: child themes, theme customization, plugin configuration, and e-commerce setup.
- Handle hosting and cPanel, site migrations, backups and maintenance across the agency's client sites.

WordPress Developer · Vocsy Infotech, Surat · part-time — Feb 2025 – Feb 2026

- Delivered two production e-commerce stores, both live today: a WooCommerce jewellery storefront for an export client and a Shopify store for a Singapore-based food retailer.
- Managed source code with Git and GitHub, and site databases with MySQL and phpMyAdmin.

WordPress & Frontend Intern · Vocsy Infotech, Surat · part-time — Aug 2024 – Jan 2025

- Built responsive layouts and interactive features on live client projects using HTML5, CSS3, and JavaScript, and was promoted to developer after six months.

PROJECTS

Jewellery e-commerce store WordPress · WooCommerce — heliosexport.com

Full WooCommerce build for a jewellery export client: product catalogue, categories, and checkout, live in production.

Food & snacks e-commerce store Shopify · Liquid — shop.sanmarfoods.com

Shopify storefront for a Singapore-based food retailer, with theme sections and product pages customized in Liquid.

Blog network of 50+ websites WordPress

50+ blogging websites designed, built and launched end to end on the AI-assisted Claude Code pipeline, at about a day per site.
