## SUMMARY

WordPress developer with 2 years of production experience at Vocsy Infotech, Surat, promoted from intern to developer within 6 months. Delivered live e-commerce stores for clients, and used an AI-assisted workflow (Claude Code) to build and launch 50+ blogging websites. BCA graduate (VNSGU, 2026) with an 8.7 CGPA. Currently working with WordPress and Claude Code (AI agents and AI-assisted development), and preparing for a move into AI/ML engineering.

## WORK EXPERIENCE

**WordPress Developer** · Vocsy Infotech, Surat — Feb 2025 – Present

- Delivered two production e-commerce stores, both live today: a WooCommerce jewellery storefront for an export client and an online store for a Singapore-based food retailer.
- Build, customize, and maintain WordPress client websites: child themes, theme customization, plugin configuration, and e-commerce setup.
- Handle day-to-day agency operations for client sites: hosting and cPanel management, site migrations, backups, and maintenance.
- Manage source code with Git and GitHub, and site databases with MySQL and phpMyAdmin.

**WordPress & Frontend Intern** · Vocsy Infotech, Surat — Aug 2024 – Jan 2025

- Built responsive layouts and interactive features on live client projects using HTML5, CSS3, and JavaScript.
- Learned WordPress theme customization and dynamic-site development on production client work.

## PROJECTS

**Jewellery e-commerce store** WordPress · WooCommerce — heliosexport.com

Full WooCommerce build for a jewellery export client: product catalogue, categories, and checkout, live in production.

**Food & snacks e-commerce store** Shopify · Liquid — shop.sanmarfoods.com

Shopify storefront for a Singapore-based food retailer, with theme sections and product pages customized in Liquid.

**Blog network of 50+ websites** WordPress

Designed, built, and launched **50+** blogging websites end to end with an AI-assisted workflow built on Claude Code: standardized base theme and plugin stack, all generated code reviewed per site, and an average build time of about a day per site.
